TO OUR READERS

Your appreciation of the journal makes us bold to suppose that some of your friends would also like to read **SCIENCE AND CULTURE**, the premier scientific bi-monthly of India devoted to the publication of the progress in pure and applied sciences. The Indian Science News Association has been conducting the journal for 84 years with the editorial co-operation of eminent scientists of India with the object of promoting and diffusing knowledge laying special stress on the progress of scientific studies here and abroad, and advocating methodical application of science to problems of national regeneration.

Editorial correspondence should be sent to the Editor-in-Chief, *Science and Culture*, 92, Acharya Prafulla Chandra Road, Kolkata : 700 009. Manuscripts prepared in accordance with the Instruction to Authors should be submitted in **Triplicate** and will not be returned unless accompanied with return postage.

Correspondence relating to subscription, advertisement and other matters should be addressed to the **Honorary. | AN ANNOUNCEMENT |

Authors of this journal will be delighted to know that DOI (Digital Object Identifier) for *Science and Culture* has been created and has been found to be successfully working. All articles published in the last issue (July-August 2019) of the journal are now DOI compliant. I thank all the Council members of ISNA and all members of the Editorial Board for their support. My special thanks to Prof. Vasant Natarajan of the Department of Physics of IISc, Bengaluru for his persistent endeavor in achieving this. He has been kind enough to have helped this venture financially as well.

In today's digital era, availability of published articles in digital mode has become a bare necessity for an illustrious journal like *Science and Culture*. DOI identifies the object (read article in the present case) digitally. DOI is a string of numbers, letters and symbols assigned to permanently identify an article or document and link it to the web. DOI of an article increases its visibility because readers can now easily locate a document digitally through web search.

You may notice that DOI of each article in this issue has been presented at the top of the article and this practice will be followed in all future issues.
