

REIMAGINING RURAL INNOVATION SYSTEMS: A CRITICAL REVIEW OF PATHWAYS TOWARD SUSTAINABLE RURAL TRANSFORMATION

RITUPARNA HALDER^{1*} AND BULBUL ROY CHOWDHURY (GHOSH)²

This article has discussed about how rural innovation systems can support sustainable and inclusive development in the rural areas. The system includes technological, institutional, and community innovation interlinkages. It gave importance to the role of intermediaries, multi-actor collaboration, and learning, while considering issues such as inclusivity gaps and scaling limits. This multi-disciplinary approach is going to call for a place-based system that integrates local knowledge, local markets, and digital access in quest of robust rural transformation.
