

AI-DRIVEN INNOVATION FOR SUSTAINABLE HEALTHCARE AND PUBLIC HEALTH RESILIENCE

MANIDIPA MUKHERJEE¹, TANUSHA PAUL PODDAR¹ AND ARUNIKA BHADRA^{2*}

In healthcare, public health and management, both have witnessed a sea of change due to Artificial Intelligence (AI) and other innovations globally. With increasing expenses of health services, manpower shortage, climate change, and the prevalence of diseases, the need for strong and resilient solutions has never been greater for healthcare globally.
