

## ROLE OF INTUITION IN CREATION OF KNOWLEDGE

B. A. DASANNACHARYA\*

---

*It is in the nature of man to strive to know truth. Every evolved person wishes to understand the truth behind whatever he can perceive through his senses or thoughts, on the basis of his existing background of knowledge. He often feels/knows that apparent may not be real and he wishes to know the real. In other words, he strives for 'true' knowledge be it material or spiritual.*
