

STORAGE OF LEAF JUICE EXTRACTED FROM SPINACH (*SPINACIA OLERACEAE* L.)

R. D. MADHEKAR AND A. M. MUNGIKAR

Leaf juice of spinach (Spinacia oleracea L.) was stored at room temperature for 33 hours to observe the changes in dry matter (DM), nitrogen (N) and sugar contents. With storage, all these constituents decreased gradually, as a result of which the yield of leaf protein concentrate (LPC) also decreased with low crude protein content.
