

## PATENT SYSTEM IN INDIA USEFUL TO SCIENTIFIC COMMUNITIES

SUSIL KUMAR MITRA\*

---

*Human creation leads to human civilization. To acknowledge the creativity of human, every country has accepted a system of recognition, which is called an Intellectual Property System that includes Patents, Designs and Trademarks. Role of Designs and Trademarks is not the concern of discussion but the Patent, which is the grant from the Government in the form of monopoly of right for a certain period to the inventor for the disclosure of invention, is of major concern today particularly for the development of scientific communities. Patent information is a useful tool for further research that is explained at length in this presentation.*
