

***SENGA SILCHARENSIS*, A NEW CESTODE SPECIES FROM THE
INTESTINE OF THE FRESH WATER FISH *CHANNA PUNCTATUS*
(BLOCH) FROM CHATLA HAOR, SILCHAR, ASSAM**

Senga silcharensis, a new cestode species from the intestine of the fresh water fish *Channa punctatus* (Bloch) has been described and compared with the other known species of the genus *Senga* in the lures of work by Dollfus (1934). It differs from all the known species of the genus in the number of hooks, testes and shape of the scolex.
