

DIVERSITY OF HEMIPTERAN INSECTS IN THE COASTAL AND NON COASTAL ENVIRONMENT OF MIDNAPORE (EAST), WEST BENGAL, INDIA

DEBDAS JANA, DIPAK KR. TAMILI AND SUSANTA KR. CHAKRABORTY

Hemipteran insects of coastal areas of Midnapore district were sampled from November 2007 to October 2010. Altogether 15 species of 14 genera belonging to 10 families have been recorded from eight different coastal and non coastal areas. The diversity and distribution of above insects have been studied. Some site specific species have been detected.
