

## RADIATION PHYSICS RESEARCH IN BOSE INSTITUTE

S.C. ROY\*

---

*This article is in continuation of the article published in the November-December 2006 issue of Science and Culture (A.M. Ghose pp. 330-336) on the same topic. It starts from where the previous author left and continues till the activities of the last year. However, the works presented here essentially represents the radiation physics research carried out in the group the author was associated with. This is not a comprehensive report and highlights the important research activities of this group only and names of some of the persons who may have worked with this group for a brief stint of time are not included in the report.*
