

# THE “FORGOTTEN” ASTRONOMICAL SOCIETY OF INDIA, CALCUTTA

RAJINDER SINGH\*

---

*The present Astronomical Society of India with its office in Hyderabad was established in 1972. The less known fact is it that in the second decade of the twentieth century, that is, in July 1910 in Calcutta the Astronomical Society of India was founded. Its objective was to popularize practical and general astronomy in India. Using the Monthly and Annual Meeting Reports of the ASI the scientific activities of the Society are explored.*
