

## USE OF MATLAB IN PHYSICS EDUCATION

ANURADHA DE<sup>1</sup> AND SUJIT KUMAR SAHA<sup>2</sup>

---

*ABSTRACT : Matlab is a versatile software and computations comprise an integral part of physics education. In this paper, some very basic problems have been solved by Matlab software using Script file format with an objective to explain physics without going into the exact mathematical solution. Computation with visual graphical demonstration using this software can be used as a teaching tool in undergraduate and school level physics education.*
